

**The program brings out the creativity in young people, while educating them in important traffic safety issues.**

The program continues it's primary aim of reducing traffic and pedestrian crashes, the No. 1 cause of death for children ages three to 14. Older students are invited to compete in subject categories relevant to novice driver safety. Students of all ages illustrate a selected safety category, under the supervision of dedicated educators and youth leaders. The program allows youth to become creative in slogan design while striving to create memorable entries, leading others to safety through example and enthusiasm. Entries are judged locally and nationally for recognition.
